

## BARD Mobile iOS App

The BARD Mobile app provides access to braille and talking books directly from the NLS Braille and Audio Reading Download (BARD). BARD contains nearly 50,000 books, magazines and music scores in audio and braille formats, with new selections added daily.

BARD Mobile will operate on an iPhone, iPad, or iPod touch with iOS 4.3 or later. Connectivity from a wireless carrier or a Wi-Fi provider is required to download material from BARD.

BARD Mobile is completely accessible to visually impaired individuals when used with Zoom or the Voice-over screen reader, two standard features on iOS operating systems.

Downloading braille materials requires that your device be connected to a refreshable braille display through Bluetooth.

Before you can use the BARD Mobile app, you must be registered with the South Dakota Braille and Talking Book Program. You must also be registered to use BARD.

Once you have an account, you are ready to begin using BARD Mobile.

Download the free app and sign in with your BARD user name and password. You will only have to sign-in once. You never have to sign-in again to use BARD Mobile.
